Youth Activities and Mental Health Services

RFP #2017-001

Questions and Answers

Question 1. In providing post release or just outside programming for youth on probation how does the probation officers determine their clients participation. Example: if a post release class is provided how can we determine how many actually participants would be able to attend at one time? Is it best to pick one geographical area (hot spots) to provide weekly or semi-weekly class to ensure the highest possible attendance?

Answer 1. Depending on the program being offered and the youth’s specific situation, programming can be court ordered or required at the discretion of the probation officer. The contractor would determine the appropriate maximum number of youth for their program, however, there is no guarantee that this number of youth would be referred, as youth would be referred based on their needs and the programming they had while in custody.

For the benefit of youth access, it is always better to have services available within or close to the community where they live.

Question 2. Who is providing educational workshops for families both inside and out the facility?

Answer 2. We do not have a comprehensive list of who provides educational workshops for families outside of the facility. The Probation Department does facilitate parenting groups outside of the facility. Currently, there are no educational programs for the parents/families of our youth within the facility other than multi-family groups being provided at Camp Kemp by StarVista.

Question 3. Under parent and family therapy, do practitioners have to be licensed? Can educational forums qualify under this category (ie teaching parents how to help youth manage stress). Under parent and family therapy, is parent education outside eligible for funding?

Does this mean that youth who are 18 years old or older are not eligible for services under this RFP? If so, where are those students coming from, refers from probation? Please
further define disconnected youth. Do you have youth in mind when you are talking about vocational training?

Answer 4. Eighteen year old youth may be eligible if they are still high school students and/or are incarcerated in one of our facilities. Vocational training is generally targeted toward youth who are not likely to go to academic college.

Question 5. For the proposal, do you want an appendix with all the exhibits or should they immediately follow the TAB to which they are connected?
